EDUCATION

King AbdulAziz University

Bachelor of Information Technology
Sub-major: Integrated Technology
2021 - May 2026
CGPA: 4.6/5

LANGUAGES

Arabic English (STEP : 90 - 2018)

SKILLS

Governance, Risk & Compliance (GRC)

- Compliance & Audit: Certified Lead Auditor (ISO 27001) proficient in implementing, auditing, and performing Gap Analysis against NCA ECC and SAMA CSF frameworks.
- Risk Management: Expertise in risk assessment, mitigation, and continuous monitoring using global standards (ISO 27005, NIST 800-37, COBIT).
- Policy & Assurance: Skilled in Information Security Governance, policy development, and assessing Third-Party Risk (TPRM).
- GRC Tool Knowledge: Conceptual understanding and design proficiency gained through developing a Senior GRC Platform Project, focusing on automating risk, control, and compliance reporting processes.

Cybersecurity & Technical Foundation

- Core Security Controls: Foundation in Identity & Access Management (IAM), Data Loss Prevention (DLP), Firewalls, Mobile Security, and basic Incident Response procedures.
- Technical Base: Networking management, database administration (SQL), and programming proficiency in Python, Java, JavaScript, and PHP for scripting, security automation, and secure application development principles.

Professional Skills

- Stakeholder Communication, Cross-Functional Collaboration, and Security Awareness Training development.
- Strong critical thinking, problem-solving abilities, and a continuous improvement mindset.

ABOUT ME

Highly accomplished Information Technology graduate specializing in Cybersecurity Governance, Risk & Compliance (GRC). Possessing an exceptional academic record (GPA: 4.6/5) and validated expertise through multiple certifications, including ISO 27001 Certified Lead Auditor, GRC Professional (GRCP), and CompTIA Security+. Skilled in risk assessment, compliance, and leveraging key frameworks such as ISO, NIST, COBIT, and COSO. Proven ability to operate in high-pressure environments (Hajj operations) and foundational knowledge in networking, programming (Python, Java, JavaScript, React.js), and databases. Seeking to enhance organizational security posture through effective governance and risk management.

CERTIFICATIONS

ISC2 - *Certified in Cybersecurity (CC)*

CompTIA - *Security+*

ISO/IEC 27001 - *Certified Lead Auditor*

GRC Certify - *GRC Professional (GRCP)*

GRC Certify - *GRC Auditor (GRCA)*

GRC Certify - *Integrated Data Privacy Professional (IDPP)*

GRC Certify - *Integrated Risk Management Professional (IRMP)*

EXPERIENCE

Maintenance Supervisor Hajj Season 2018 - 2019

Ministry Of Islamic Affairs, Dawah and Guidance

supervise facility maintenance, overseeing cleaning and ensuring the availability of supplies and equipment.

Field Sales Team Hajj Season 2021

Saudi Telecom Company

A salesman at STC during Hajj assists pilgrims with mobile services and support, ensuring seamless communication.

Platform Agent Hajj Season 2023

Saudi Railways Company

Ensured operational safety and compliance with regulations by managing large pilgrim crowds, supporting risk mitigation and crisis response efforts during peak Hajj operations.

Internship 2025 Summer

Innovation and Entrepreneurship Center

- Developed a landing page and implemented a reward and ranking system for Fazza3 mobile app.
- Built a responsive landing page for Jeerah company aligned with branding goals.
- Created a user interface for Fahis company to display 3D models after backend processing.
- Gained hands-on experience in web development, UI/UX design, and working on real startup projects.

PROJECTS

GRC MASTERY

- **Information Security Management System (ISMS) Implementation:** Successfully completed ISO 27001 Lead Auditor training by developing a complete ISMS from scratch. Key deliverables included a comprehensive Risk Assessment, the Statement of Applicability (SoA), and drafting all core security policies and procedures required for certification.
- **Cybersecurity Maturity Assessment:** Executed an end-to-end cybersecurity maturity assessment using the NIST Cybersecurity Framework (CSF), identifying organizational gaps and prioritizing improvement areas.
- **Third-Party Risk Management (TPRM):** Conducted a Third-Party Risk Assessment on a simulated supplier. This involved reviewing the security assessment questionnaire, analyzing controls, and summarizing key security risks identified.
- **Asset Management Design:** Designed and documented a process for capturing critical assets and maintaining a Configuration Management Database (CMDB), ensuring a foundational element of effective risk management and ISMS maintenance.

SENIOR PROJECT — AUTOMATED CYBERSECURITY GRC PLATFORM

- **Leadership & Agile Management:** Led a 3-person development team through the full SDLC using Agile methodology, overseeing sprint planning, task delegation, and version control (GitHub).
- **GRC Solution Design:** Conceptualized and designed a centralized web platform to automate NCA ECC compliance, addressing the industry-wide inefficiency of manual evidence collection and "audit panic".
- **Full-Stack Architecture:** Engineered a secure Three-Tier Architecture utilizing React.js (Frontend), Django (Backend), and PostgreSQL (Database) to ensure scalability and performance.
- **AI-Driven Automation:** Developed a custom Intelligent Validation Engine using Tesseract OCR and Python; the model extracts text from evidence screenshots and validates it against specific NCA ECC technical parameters (e.g., password age, session timeouts).
- **Risk Management Integration:** Implemented an "Auto-Risk Trigger" logic that automatically instantiates risk entries upon compliance failure, linking specific technical gaps to business risks and generating real-time executive heatmaps.
- **Data Sovereignty & Security:** Architected the system for On-Premise deployment with AES-256 encryption for data at rest, ensuring full compliance with Saudi data sovereignty regulations by eliminating external cloud API dependencies.

PROFESSIONAL DEVELOPMENT

<i>Oxmedica — Petrochemical Engineering</i>	2019
<i>GRC Mastery — Cybersecurity GRC</i>	2025
<i>KAU — Essential soft skills for success</i>	2025
<i>KAU — Data Mining & Warehousing</i>	2025
<i>KAU — Data Network Design and Evaluation</i>	2026
<i>KAU — Software Engineering (II)</i>	2026
<i>WEP — KAUST Open House & Winter Enrichment Program</i>	2026
